

April 21, 2011

Stockton Dermatology is a Medical and Cosmetic Dermatology practice that offers a variety of services to help rejuvenate the skin. Our advanced solutions begin with using products that visibly improve the skin after just a few treatments. We pride ourselves in being able to provide patients with custom skin care programs that address their individual needs.

Throughout the past six months, our aesthetic clinician has used Global Skin Solutions' professional products for patients who have experienced uneven skin tones, hyperpigmented lesions, discolorations and razor bumps. These professional products have lessened these challenges and minimized potential risk factors. Additionally, the home care products, Global Skincare, have received great reviews by our staff and patients.

As a board certified dermatologist with more than 20-years experience, I endorse these corrective products formulated by Pamela Springer.

Sincerely,

Toni C. Stockton, M.D. F.A.A.D., PLLC  
Board Certified Dermatologist
